01 SUMMARY

Full Stack Laravel Developer with 3+ years of experience designing and shipping scalable SaaS applications, RESTful APIs, AI-powered tools, and enterprise web platforms. Deep expertise in Laravel, PHP, Vue.js, React, Livewire, MySQL, PostgreSQL, MSSQL, and Redis, with a strong focus on multi-tenant architecture, AI chatbot integration, authentication & authorization, database optimization, and open-source package development.

02 EXPERIENCE

Laravel Developer — DDT Software & Ecommerce Pvt Ltd *Sep 2025 — Present*

- Leading backend development for AI-integrated SaaS products, including multi-tenant platforms and AI chatbot systems.
- Architected and maintained the JobBot open-source Laravel AI chatbot package, published on Packagist.
- Built and scaled RESTful APIs, resume-parsing pipelines, and LLM-powered candidate search features.
- Owned database design and query optimization across MySQL, PostgreSQL, and Redis-backed caching layers.
- Collaborated on React/Vue frontends and drove code reviews, deployments, and production support.

Laravel / PHP Developer — Ipistis Technologies *Aug 2024 — Sep 2025*

- Developed enterprise-grade Laravel applications with role-based authentication and authorization.
- Built scalable REST APIs and Livewire-based dynamic interfaces for eCommerce and service-booking platforms.
- Improved application performance using Redis, eager loading, caching, and optimized SQL queries.
- Worked across MySQL, PostgreSQL, and Microsoft SQL Server in production environments.
- Integrated third-party APIs and participated in deployment, code reviews, and production support.

Laravel / PHP Developer — Hilt Web Solutions *Mar 2023 — Aug 2024*

- Developed Laravel and CodeIgniter applications with secure authentication systems.
- Built reusable backend modules, optimized database queries, and integrated payment gateways.
- Collaborated closely with frontend developers on API contracts and delivery.

03 PROJECTS

JobBot — Laravel AI Chatbot Package — Open Source · Packagist

- AI chatbot, resume parser, candidate & job search, voice input, custom intent system.
- Publishable configuration with OpenRouter AI integration; distributed as a Laravel package.

Multi-Tenant Hospital Management System — SaaS · Laravel · Vue.js

- Subdomain-based multi-tenancy with tenant database isolation, dynamic theming, and RBAC.
- Optimized tenant asset loading and built secure authentication and REST APIs.

AI Job Portal — Laravel · Livewire · AI

- AI-powered chatbot for candidate assistance with resume parsing and skill extraction.
- Candidate/employer dashboards with job search, recommendations, and dynamic Livewire UI.

MealBoy — Restaurant Ordering System — Laravel · Livewire · MySQL

- Cart, checkout, order management, admin dashboard, and REST APIs.

Multi-Vendor eCommerce — Laravel · React · MySQL

- Vendor management, product APIs, order workflow, authentication, React integration.

AutoInspectPro — Laravel · MySQL

- Appointment booking with calendar, reports, and notification system.

04 TECHNICAL SKILLS

PHP · JavaScript · Laravel · Livewire · Vue.js · React.js ·
CodeIgniter
MySQL · PostgreSQL · MSSQL · Redis · Query Optimization · Indexing
REST APIs · Sanctum · JWT · RBAC · Queue Jobs · Postman
AI Agents & LLM Apps · OpenAI · Git / GitHub · AWS · Docker ·
Kubernetes

05 CERTIFICATIONS & LEARNING

AWS (in progress) · Docker · LLM Application Development · OpenAI API ·
Laravel Package Development

06 EDUCATION

Diploma in Computer Science — Suresh Gyan Vihar University

2024 · CGPA 7.5

07 CAREER OBJECTIVE

To contribute as a Laravel Backend Engineer in a product-driven organization — building scalable applications, solving complex engineering challenges, contributing to open-source software, and growing in cloud technologies and AI-powered application development.
